**Joomla Web Development**

## Content Course Joomla Web Development

In the course Joomla Web Development, participants learn to use the Joomla Content Management System, CMS, to set up a complete web site. The course is based on the latest version of Joomla. Programming knowledge is no required to do this.

### Joomla Intro

It is discussed how Joomla components are put together and how they are linked. Attention is paid to components such as sections, articles, banners, ads, images and categories.

### Joomla Menu's

Also addressed is how menus are linked in Joomla and how items and descriptions are added.

### Joomla Extensions

Joomla can be extended with extensions that are available in many places and that can extend the functionality. A number of these extensions will be demonstrated. Some are free for others you will need a license.

### Templates and Modules

Further templates that give a certain structure to Joomla components are treated and application modules are discussed as well.

### Joomla Configuration

Finally there is attention for all kind of issues related to the configuration of Joomla. After completing this course participants will be able to build a web site with Joomla all by themselves.
