

## **PHP Programmer Certification**

### Audience PHP Programmer Certification Course

The course PHP Programmer Certification is intended for experienced PHP developers that want to prepare themselves for the PHP 7 Programmers exam.

### Prerequisites Course PHP Programmer Certification

Knowledge and experience with Web development and <u>PHP programming</u> and <u>Advanced PHP Programming</u> is required to participate in this course.

### **Realization Training PHP Programmer Certification**

The course has a hands-on nature. The theory is interspersed with practical exercises. Several mock exams with exam test questions are discussed. The course material is in English.

### **Certification PHP**

Participants receive an official certificate PHP Programmer Certification after successful completion of the course.

### **Content Course PHP Programmer Certification**

In the course PHP Programmer Certification the topics for the PHP 7 Programmers exam are discussed on the basis of test questions. The course also has the purpose to give the best possible impression of what one can expect on the actual exam.

### **Exam Training**

The course is an exam-oriented training and programming assignments are not part of the course program.

### **Demo Scripts**

Participants can however experiment with demo scripts where certain aspects of the exam are discussed. Extra attention is paid to topics that are commonly experienced as difficult.

### **Exam Topics**

The exam topics on the program are: PHP Basics, Object Oriented Programming, new features in PHP 7, stream I/O and network programming, using functions and arrays, working with strings and regular expressions, accessing databases and SQL, accessing XML data and Web services, security and finally the use of Design Patterns.

# **Modules Course PHP Programmer Certification**

Exam Topic: PHP Basics	Exam Topic: Date Formats and Types	Exam Topic: PHP 7 Features
Arithmetic and Bitwise Operators	XML Basics	Scalar Type Declarations
Assignment Operators	XML Extension	Coercive and Strict Mode
Comparison Operators	Character Encodings	Return Type Declarations
String and Array Operators	SimpleXML	Null Coalescing Operator
Logical Operators	SimpleXML Methods	Spaceship Operator
Variables	DOM	Constant Arrays
Condition Control Structures	SOAP and REST	Anonymous Classes
Loop Control Structures	SOAP Constants	Closure::call()
Special Constructs	REST Principles	Filtered unserialize()
Constants	REST Context Switching	Expectations
Namespaces	JSON	Integer Division
Extensions	JSON Constants	Use Statement
Configuration and Performance	DateTime Methods	Error Handling
		-
Exam Topic: Strings	Exam Topic: Arrays	Exam Topic: Input and Output
Strings	Arrays	Files
Comparing Strings	Array Operations	File System Functions
String Functions	Looping Arrays	File Operations
Formatting Output	Array Methods	Streams
Regular Expressions	Sorting Arrays	File Wrappers
RegEx Syntax	Other Array Functions	Stream Contexts
Encoding	ArrayObject Class	Reading and Writing
Exam Topic: Object Orientation	Exam Topic: Databases	Exam Topic: Security
Exam ropic: Object Orientation		Exam ropic. Security
Classes and Objects	Databases	Configuration
Classes and Objects	Databases	Configuration
Classes and Objects Inheritance	Databases SQL Statements	Configuration Built-in Safeguards
Classes and Objects Inheritance Abstract Classes and Interfaces	Databases SQL Statements Queries	Configuration Built-in Safeguards PHP as Apache Module
Classes and Objects Inheritance Abstract Classes and Interfaces Exceptions	Databases SQL Statements Queries SQL Functions	Configuration Built-in Safeguards PHP as Apache Module Session Security
Classes and Objects Inheritance Abstract Classes and Interfaces Exceptions Properties and Methods	Databases SQL Statements Queries SQL Functions Joins	Configuration Built-in Safeguards PHP as Apache Module Session Security Cross-Site Scripting
Classes and Objects Inheritance Abstract Classes and Interfaces Exceptions Properties and Methods Static Modifier	Databases SQL Statements Queries SQL Functions Joins Prepared Statements	Configuration Built-in Safeguards PHP as Apache Module Session Security Cross-Site Scripting Cross-Site Request Forgeries SQL Injection
Classes and Objects Inheritance Abstract Classes and Interfaces Exceptions Properties and Methods Static Modifier Autoloading and Reflection Type Hinting	Databases SQL Statements Queries SQL Functions Joins Prepared Statements Transactions	Configuration Built-in Safeguards PHP as Apache Module Session Security Cross-Site Scripting Cross-Site Request Forgeries SQL Injection Remote Code Injection
Classes and Objects Inheritance Abstract Classes and Interfaces Exceptions Properties and Methods Static Modifier Autoloading and Reflection Type Hinting Late Static Binding	Databases SQL Statements Queries SQL Functions Joins Prepared Statements Transactions PDO PDO Connections	Configuration Built-in Safeguards PHP as Apache Module Session Security Cross-Site Scripting Cross-Site Request Forgeries SQL Injection Remote Code Injection Dynamic Data Attacks
Classes and Objects Inheritance Abstract Classes and Interfaces Exceptions Properties and Methods Static Modifier Autoloading and Reflection Type Hinting Late Static Binding Magic Methods	Databases SQL Statements Queries SQL Functions Joins Prepared Statements Transactions PDO PDO Connections PDO Queries	Configuration Built-in Safeguards PHP as Apache Module Session Security Cross-Site Scripting Cross-Site Request Forgeries SQL Injection Remote Code Injection Dynamic Data Attacks Input Filtering and Escaping Output
Classes and Objects Inheritance Abstract Classes and Interfaces Exceptions Properties and Methods Static Modifier Autoloading and Reflection Type Hinting Late Static Binding	Databases SQL Statements Queries SQL Functions Joins Prepared Statements Transactions PDO PDO Connections	Configuration Built-in Safeguards PHP as Apache Module Session Security Cross-Site Scripting Cross-Site Request Forgeries SQL Injection Remote Code Injection Dynamic Data Attacks
